

**Latvia University of Life Sciences and Technologies  
Faculty of Engineering**

**22<sup>nd</sup> International Scientific Conference  
ENGINEERING FOR RURAL  
DEVELOPMENT**

**Proceedings, Volume 22**

**May 24-26, 2023**

**Jelgava 2023**

## **PROGRAM COMMITTEE**

### **Chairman:**

Aivars Aboltins                      Latvia University of Life Sciences and Technologies, Latvia

### **Members:**

Valeriy Adamchuk                      National Academy of Agrarian Science of Ukraine (NAASU), Ukraine  
Mariusz Adamski                      Bialystok University of Technology, Poland  
Zhayyt Algazy                      Kazakh National Research Technical University, Kazakhstan  
Andres Annuk                      Estonian University of Life Sciences, Estonia  
Atilgan Atilgan                      Suleyman Demirel University, Turkey  
Marco Bietresato                      University of Udine, Italy  
Milan Brozek                      Czech University of Life Sciences Prague, Czech Republic  
Volodymyr Bulgakov                      National University of Life and Environmental Sciences of Ukraine,  
Ukraine  
Lorant Denes David                      Eszterházy Károly University, Hungary  
Jan Dizo                      University of Zilina, Slovakia  
Givi Gavardashvili                      Georgian Technical University, Georgia  
Marek Gaworski                      Warsaw University of Life Science, Poland  
Semjons Ivanovs                      Latvia University of Life Sciences and Technologies, Latvia  
Algirdas Jasinskas                      Vytautas Magnus University, Lithuania  
Jan Radoslaw Kaminski                      Warsaw University of Life Science, Poland  
Jozsef Kapozsta                      Szent Istvan University, Hungary  
Pavel Kic                      Czech University of Life Sciences Prague, Czech Republic  
Vitalijs Komasilovs                      Latvia University of Life Sciences and Technologies, Latvia  
Aigars Laizans                      Latvia University of Life Sciences and Technologies, Latvia  
Chou Li-Chen                      Shantou University, China  
Tomasz Lipinski                      University of Warmia and Mazury in Olsztyn, Poland  
Francesco Marinello                      University of Padova, Italy  
Agris Nikitenko                      Riga Technical University, Latvia  
Juri Olt                      Estonian University of Life Sciences, Estonia  
Andrea Pezzuolo                      University of Padova, Italy  
Simon Popescu                      Transylvania University of Brasov, Romania  
Juris Priekulis                      Latvia University of Life Sciences and Technologies, Latvia  
Stasys Slavinskas                      Vytautas Magnus University, Lithuania  
George Srzednicki                      University of New South Wales, Australia  
Aleksejs Zacepins                      Latvia University of Life Sciences and Technologies, Latvia  
Wanhao Zhang                      University College London, United Kingdom  
Yang Zhang                      University of Sheffield, United Kingdom

## **EDITORS**

Editor of language: Larisa Malinovska

Technical editor: Vitalijs Osadcuks

## **CONFERENCE ORGANISING COMMITTEE**

### **Chairman:**

Janis Palabinskis, Latvia University of Life Sciences and Technologies, Latvia

### **Members:**

Aivars Aboltins	Latvia University of Life Sciences and Technologies, Latvia
Dainis Berjoza	Latvia University of Life Sciences and Technologies, Latvia
Baiba Briede	Latvia University of Life Sciences and Technologies, Latvia
Ilmars Dukulis	Latvia University of Life Sciences and Technologies, Latvia
Ainars Galins	Latvia University of Life Sciences and Technologies, Latvia
Janis Kjakste	Latvia University of Life Sciences and Technologies, Latvia
Vitalijs Osadcuks	Latvia University of Life Sciences and Technologies, Latvia
Aldis Pecka	Latvia University of Life Sciences and Technologies, Latvia
Mareks Smits	Latvia University of Life Sciences and Technologies, Latvia
Kaspars Vartukapteinis	Latvia University of Life Sciences and Technologies, Latvia
Natalija Vronska	Latvia University of Life Sciences and Technologies, Latvia
Olafs Vronskis	Latvia University of Life Sciences and Technologies, Latvia

**ABSTRACTED AND INDEXED:** Elsevier SCOPUS, Clarivate Analytics Web of Science, AGRIS, CAB Abstracts, CABI full text, EBSCO Academic Search Complete, EBSCO Central & Eastern European Academic Source, Agricola.

Scopus<sup>®</sup>

**CROSSREF DATABASE:** DOI for each paper

**CROSS-CHECKED BY:** CrossRef.org Similarity Check

**ONLINE:** Proceedings *ENGINEERING FOR RURAL DEVELOPMENT* is available online at <http://tf.llu.lv/conference/proceedings2023/>

**ISSN 1691-5976**

## CONTENT

<b>Andis Lazdins, Kristaps Makovskis, Agris Zimelis, Igors Gusarevs, Germans Gusarevs</b> PRODUCTIVITY OF NEW HARVESTER PROTOTYPE IN WILLOW PLANTATIONS WITH DIFFERENT GROWING STOCK.....	14
<b>Iryna Humeniuk, Iryna Mushenyk, Nadiia Popel, Oksana Kuntso</b> STRATEGIES FOR EFFECTIVE COMMUNICATION IN EDUCATIONAL ENVIRONMENT IN WARTIME.....	22
<b>Viktor Nikolaev, Janat Musayev, Algazy Zhauyt, Aizhan Makhanova, Zhanar Mukatanova, Anar Kabytkarim, Elnur Kozhakmetov</b> METHOD FOR DETERMINING AREA OF PARAMETRIC RESONANCES OF WHEELSET OF RAILWAY VEHICLE .....	29
<b>Iryna Humeniuk, Olha Prokopova, Oksana Maksymets, Anastasiia Polishchuk</b> LANGUAGE ACQUISITION FOR ESP STUDENTS WITH SUGGESTOPEDIA METHOD APPLICATION .....	38
<b>Inna Samuilik, Felix Sadyrbaev, Svetlana Atslega</b> ON MATHEMATICAL MODELS OF ARTIFICIAL NEURAL NETWORKS .....	45
<b>Miroslav Blatnický, Denis Molnar, Jan Dizo, Vadym Ishchuk</b> VEHICLE SLALOM PASSAGE ANALYSIS .....	51
<b>Ales Dittrich, Radek Prochazka, Josef Popelka, Dong Nguyen Phu</b> EFFECT OF HVO CNG DUAL-FUEL OPERATION MODE ON EMISSIONS AND PERFORMANCE OF CI ENGINE.....	58
<b>Atanas Atanasov, Ivaylo Hristakov, Veselin Dochev</b> MONITORING AGROMETEOROLOGICAL FACTORS AND BEEHIVE WEIGHT DURING SUNFLOWER ( <i>HELIANTHUS ANNUUS</i> ) FLOWERING .....	64
<b>Raimonds Valdmanis, Viesturs Sints, Maija Zake</b> CO-FIRING AND MICROWAVE PRE-TREATMENT OF LIGNOCELLULOSIC PELLETS FOR CONTROL OF THERMOCHEMICAL CONVERSION OF BIOMASS MIXTURES AND SUSTAINABLE ENERGY PRODUCTION .....	71
<b>Oleg Zagurskiy, Mykhailo Pivtorak, Sergii Bondariev, Oleksandr Demin, Igor Kolosok</b> METHODS OF RELIABILITY MANAGEMENT IN SUPPLY CHAIN .....	78
<b>Jaymin-Vrajlal Sanchaniya, Sai-Pavan Kanukuntla, Kagan-Berkay Senyurt</b> FABRICATION AND MECHANICAL PROPERTIES OF POLYMER COMPOSITE NANOFIBER MATS .....	85
<b>Viktors Ivanovs, Pavels Gavrilovs</b> ANALYSIS AND INVESTIGATION ON DEFECTS – DELAMINATION AND SPALLING OF METAL ON ROLLING SURFACE OF RAIL HEAD UNDER CODE X 10.1 .....	91
<b>Rashmi Sanchaniya, Ineta Geipele</b> IDENTIFYING EXISTING PROPERTIES FOR REUSE INTO SOCIAL HOUSING .....	100
<b>Vidas Damanauskas, Algirdas Janulevicius</b> INFLUENCE OF TRACTOR SLIPPAGE ON CROP YIELD .....	108
<b>Andrejs Jaunzems, Ilze Balode</b> ECONOMICAL LINKAGES OF INDUSTRY ““ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY”” IN BALTIC STATES AND FINLAND .....	114
<b>Janis Kajaks, Karlis Kalnins, Martins Zalitis, Juris Matvejs</b> RHEOLOGICAL PROPERTIES OF VIRGIN, RECYCLED AND MIXED HIGH DENSITY POLYETHYLENE AND WOOD PLASTIC COMPOSITES WITH PLYWOOD SANDING DUST .....	124

<b>Jan Dizo, Miroslav Blatnický, Vadym Ishchuk, Sebastian Solcansky</b> COMPARISON OF SELECTED OUTPUTS OF RAIL VEHICLE BOGIE VARIANT SOLUTIONS.....	131
<b>Algirdas Jasinskas, Savelii Kukharets, Olena Sukmaniuk, Vladyslav Kovalchuk</b> EXPERIMENTAL STUDY OF GASIFICATION RATE OF FAST-GROWING WILLOW BIOMASS .....	138
<b>Karlis Amatnieks, Ruslans Smigins, Aivars Birkavs</b> THERMODYNAMIC AND NO <sub>x</sub> EMISSION ANALYSIS OF DIESEL ENGINE WITH INTAKE MANIFOLD STEAM INJECTION .....	145
<b>Vadym Ishchuk, Jan Dizo, Miroslav Blatnický, Sebastian Solcansky</b> ASSESSMENT OF DERAILMENT QUOTIENT OF LOCOMOTIVE BOGIE .....	152
<b>Jozsef Kaposzta, Balazs Lorinc</b> STRATEGIC ANALYSIS OF WELFARE INDICATORS IN EU MEMBER STATES THAT JOINED EU AFTER 2004 DURING 2015-2021 .....	158
<b>Alexander Janushevskis, Sanjay-Rajni Vejanand, Agris Gulevskis</b> SHAPE OPTIMIZATION OF VENTILATION ELEMENTS FOR PROTECTIVE CLOTHING BY USING METAMODELING APPROACH.....	164
<b>Igor Tsiz, SerhiĻ– Khomych, Volodymyr Didukh, SerhiĻ– Yukhymchuk</b> STUDY OF DEHYDRATION OF ORGANIC SAPROPEL BY COMPRESSION METHOD .....	173
<b>Tomasz Lipinski, Jacek Pietraszak</b> MODIFICATION OF ALSI7MG ALLOY WITH SR AND SB .....	179
<b>Tomasz Lipinski, Jacek Pietraszak</b> EFFECT OF 10% NaCl ON BASIC CARBON STRUCTURAL P235TR2 STEEL AT 10°C.....	185
<b>Eriks Kronbergs, Mareks Smits</b> KINEMATIC ANALYSIS OF PARALLEL TRANSFER MECHANISM .....	191
<b>Andis Bardulis, Dana Purvina, Arta Bardule, Andis Lazdins</b> POTENTIAL ROLE OF TREE INTRODUCTION IN AGRICULTURAL LAND TO REDUCE GREENHOUSE GAS EMISSIONS .....	196
<b>Uldis Strautins, Maksims Marinaki</b> ON MODELLING OF THREE DIMENSIONAL FLOW IN EXTRACTION OF BIOLOGICALLY ACTIVE SUBSTANCES FROM PLANTS.....	204
<b>Roman Antoshchenkov, Vitalina Antoshchenkova, Viktor Kis, Dmytro Smitskov</b> INCREASING ACCURACY OF MEASURING FUNCTIONING PARAMETERS OF AGRICULTURAL UNITS .....	210
<b>Iulian Vocea, Florin Nenciu, Mihai Matache, Remus Oprescu, Vlad-Nicolae Arsenoiaia</b> EXPERIMENTAL RESEARCH ON PRODUCTION AND USE OF FLOATING PELLETS IN FISH FEED IN AQUACULTURE SYSTEMS .....	216
<b>Ricardas Malkus, Jurate Liebuviene, Vida Jokubyniene</b> UNIFIED EVALUATION CRITERIA SYSTEM FOR SELECTION OF MOST PREFERABLE MODE, ROUTE AND MEANS OF TRANSPORTATION FOR OVERSIZED AND SUPER HEAVY CARGOES .....	224
<b>Rita Lukacs, Andras Szeberenyi, Arpad Papp-Vary</b> ATTITUDES TOWARDS ENVIRONMENTALLY CONSCIOUS LIFESTYLE AMONG UNIVERSITY STUDENTS IN BUDAPEST - IN LIGHT OF THEIR PURCHASING DECISIONS AND WASTE MANAGEMENT.....	233
<b>Vida Jokubyniene, Jurate Liebuviene</b> RESEARCH IN VEHICLE EXHAUST GAS COMPLIANCE WITH EURO STANDARD .....	242
<b>Andis Lazdins, Kristaps Makovskis, Agris Zimelis, Santa Kaleja</b> GREENHOUSE GAS EMISSIONS IN TYPICAL FOREST BIOFUEL SUPPLY CHAINS IN STATE FORESTS .....	250

<b>Ramunas Mioldazys, Egle Jotautiene, Aloyzas Gaudutis, Algirdas Jasinskas</b> COMPARISON OF PHYSICAL MECHANICAL PROPERTIES OF GRANULATED FERTILIZER PRODUCED FROM COMPOSTED CATTLE AND DRIED COW, PIG AND POULTRY MANURE .....	258
<b>Viacheslav Bratishko, Sergey Shulga, Olena Tigunova, Oksana Achkevych</b> ULTRASONIC CAVITATION OF LIGNOCELLULOSIC RAW MATERIALS AS EFFECTIVE METHOD OF PREPARATION FOR BUTANOL PRODUCTION .....	264
<b>Zbigniew Siemiatkowski, Dmitrij Morozow, Mirosław Rucki, Mykola Prokopiv, Volodymyr Nerubatskyi, Ludmila Voloshina, Edvin Hevorkian</b> STUDY IN DURABILITY OF CR <sub>2</sub> O <sub>3</sub> -BASED CERAMIC CUTTING TOOLS .....	269
<b>Augustina Pruteanu, Nicoleta Vanghele, Dan Cujbescu, Mihaela Nitu, Iuliana Gageanu</b> REVIEW OF EFFECTIVENESS OF VISUAL AND AUDITORY BIRD SCARING TECHNIQUES IN AGRICULTURE.....	275
<b>Olha Chaikovska, Oksana Palyliulko, Liudmyla Komarnitska, Maryna Ikonnikova</b> IMPACT OF MINDSET ACTIVITIES ON PSYCHOLOGICAL WELL-BEING AND EFL SKILLS OF ENGINEERING STUDENTS IN WARTIME.....	282
<b>Martins Irbe, Janis Viba, Marina Cerpinska, Vitalijs Beresnevics, Kristaps Spade</b> STUDY OF FLEXURAL AND YIELD STRENGTH OF GYPSUM COMPOSITE BOARDS .....	288
<b>Jozsef Kaposzta, Balazs Lorinc</b> EXAMINING REGIONAL ROLE OF INDUSTRIAL PRODUCTION IN TRANSFORMATION OF HUNGARIAN ECONOMIC STRUCTURE .....	294
<b>Michal Ballay, Jaroslav Kapusniak, Jozef Kubas, Ludmila Macurova</b> ANALYSIS OF RESPONSE ACTIVITY OF FIRE BRIGADES IN EVENT OF TRAFFIC ACCIDENT WITH OCCURRENCE OF HAZARDOUS SUBSTANCE NEAR PROTECTED AREA OF VILLAGE.....	301
<b>Laura Leja, Uldis Strautins</b> STUDY OF BIOMASS PELLET NETWORK MODEL FOR HEAT AND MASS TRANSPORT IN POROUS MEDIA THROUGH GAS CHANNELS .....	307
<b>Dmitrijs Gorbacovs, Pavels Gavrilovs, Janis Eiduks, Guntis Strautmanis</b> FAILURE ANALYSIS OF RUBBER-CORD COUPLINGS OF ER2 SERIES ELECTRIC TRAINS.....	313
<b>Ludmila Macurova, Pavol Kohut, Miroslav Redl, Michal Ballay</b> ANALYSIS OF ACCIDENT EVENT - AGRICULTURAL MACHINE AND MOTORCYCLIST .....	321
<b>Sandra Gusta, Mareks Pavars, Kaspars Grabens</b> CONSTRUCTION INDUSTRIES WASTE CIRCULATION PROBLEMS IN LATVIA .....	328
<b>Anda Abola, Antonija Rimša, Maris Strazds, Rita Veilande, Gita Revalde</b> DATA CORRELATION OF MERCURY IN EGGSHELLS AND EGGSHELL MEMBRANES OF WILD BIRDS .....	338
<b>Annika Paltsepp</b> OPTIMIZATION OF STEPPED INELASTIC TUBES .....	344
<b>Mihails Urbans, Jelena Pundure, Rihards Veiss</b> AVIATION ACCIDENT - FIRE MODELLING USING PROGRAMME PATHFINDER IN RIGA AIRPORT LIABILITY AREA .....	350
<b>Vasyl Khmelovskyi, Victor Rebenko, Oleg Zabolotko, Viacheslav Bratishko</b> IMPROVEMENT OF VACUUM PUMP DESIGN FOR MILKING ANIMALS .....	357
<b>Yevhenii Aftandiljants, Svyatoslav Gnyloskurenko, Helena Meniailo, Valerii Khrychikov</b> INFLUENCE OF TECHNOLOGICAL FACTORS ON FORMATION PROCESS OF BIMETALLIC CASTINGS .....	364
<b>Indulis Straume, Imants Plume, Vilis Dubrovskis, Viktors Dreimanis, Eriks Zukovskis</b> BIOGAS POTENTIAL FROM CO-FERMENTATION OF FOOD LEFTOVERS AND LIGNOCELLULOSIC BIOMASS AT MESOPHILIC TEMPERATURES .....	371

<b>Anete Kalnina, Gunita Mazure</b> OPPORTUNITIES FOR USE OF CRYPTO-ASSETS IN RENEWABLE ENERGY SECTOR WITHIN EUROPEAN UNION LEGAL FRAMEWORK .....	378
<b>Viktor Trokhaniak, Aivars Aboltins, Semjons Ivanovs, Ivan Holovach, Valerii Adamchuk, Oleh Chernysh</b> SIMULATION OF NEW DESIGN HEAT-EXCHANGE EQUIPMENT FOR MICROCLIMATE MAINTENANCE SYSTEMS IN POULTRY HOUSES .....	384
<b>Oleg Zabolotko, Oksana Achkevych, Svitlana Potapova, Ruslan Kisilov</b> RESEARCH IN MILKING MACHINE OF PAIRWISE COMBINED TYPE.....	390
<b>Vytautas Adomavicius, Gintvile Simkoniene</b> OVERVIEW OF INNOVATIONS AND RECOMMENDATIONS FOR EFFICIENT OPERATION OF RES-BASED POWER PLANTS .....	397
<b>Olha Chaikovska, Olena Niskhodovska, Valentyna Spivachuk, Alina Kruk</b> ENHANCING EFL PROFESSION-BASED VOCABULARY ACQUISITION THROUGH 3D ENGINEERING ANIMATION FOR ENGINEERING STUDENTS.....	407
<b>Sandija Zeverte-Rivza, Peteris Rivza, Ina Gudele</b> IMPACT OF DIGITALISATION AND R&D ON THE ECONOMIES OF EU MEMBER STATES .....	413
<b>Aleksandrs Okss, Aleksandrs Valisevskis, Ugis Briedis, Ilze Baltina</b> FUNCTIONAL FABRICS FOR MULTILAYERED TEXTILE PRESSURE SENSORS: COMPARISON OF STRUCTURES AND SENSITIVITY CHARACTERISTICS.....	419
<b>Olafs Vronskis, Aivars Kakitis</b> FRICTION PROPERTIES OF REED STALKS .....	427
<b>Michal Ballay, Jozef Kubas</b> ANALYSIS OF CAUSES AND CONSEQUENCES OF ELECTRIC CAR ACCIDENTS.....	433
<b>Jozef Kubas, Michal Ballay</b> DEVELOPMENT OF CHARGING INFRASTRUCTURE WITH REGARD TO DIFFERENCES OF REGIONS IN ENVIRONMENT OF SLOVAKIA .....	439
<b>Olena Deviatko, Nataliia Kanivets, Tereziiia Lokes-Krupka, Serhii Kravchenko, Mikhailo Mushtruk</b> INNOVATIVE ENGINEERING MODELING TECHNOLOGICAL PROCESS OF URINE COLLECTION IN DOGS.....	445
<b>Dana Purvina, Ieva Licite, Aldis Butlers, Andis Lazdins, Guntis Saule, Andris Turks, Larysa Prysiazhniuk</b> EVALUATION OF PEAT LAYER THICKNESS EFFECT ON SOIL GHG FLUXES .....	454
<b>Zaiga Anna Zvaigzne, Aldis Butlers</b> APPLICATION OF FOURIER-TRANSFORM INFRARED SPECTROSCOPY FOR QUANTIFICATION OF CHEMICAL PARAMETERS IN PEAT SAMPLES .....	461
<b>Iiona Skranda, Aldis Butlers</b> APPLICATION OF FOURIER INFRARED SPECTROSCOPY METHOD FOR QUANTIFICATION OF FOLIAR LITTER COMPOSITION .....	467
<b>Marco Bietresato, Gellio Ciotti, Alessandro Zironi, Roberto Zironi, Rino Gubiani</b> PROPOSAL FOR METHODOLOGY TO ANALYSE OPERABILITY OF WINE PRODUCTION PLANT IN TERMS OF POWER DEMAND .....	473
<b>Alberts Auzins, Imants Jansons</b> MODELLING OF FAM-GATE NITROGEN BALANCE IN PIG PRODUCTION - CASE STUDY OF LATVIA .....	479
<b>Aleksejs Safonovs, Aleksey Mironov, Pavel Doronkin, Vitalijs Kuzmickis</b> SENSITIVITY SPREAD OF PIEZO ELECTRIC FILMS USED AS SENSORS FOR MACHINE AND STRUCTURAL MONITORING.....	486
<b>Aleksey Mironov, Pavel Doronkin</b> QUANTITATIVE EVALUATION OF TEETH GEARS APPLYING TECHNIQUES OF VIBROPASSPORT.....	492

<b>Volodymyr Bulgakov, Semjons Ivanovs, Ivan Holovach, Oleg Adamchuk, Aivars Aboltins, Yevhen Ihnatiev, Svitlana Polishchuk</b> THEORETICAL DETERMINATION OF ABSOLUTE SPEED OF MINERAL FERTILISER PARTICLES FROM CENTRIFUGAL SPREADING DISC .....	498
<b>Volodymyr Bulgakov, Adolfs Rucins, Ivan Holovach, Oleg Adamchuk, Aivars Aboltins, Hrihorii Zabolotnyi, Larysa Kolomiets, Svitlana Polishchuk</b> COMPUTER INVESTIGATION OF MINERAL FERTILISER PARTICLE MOVEMENT ALONG CENTRIFUGAL SPREADER DISC INCLINED UNDER ANGLE TO HORIZONTAL PLANE .....	506
<b>Volodymyr Bulgakov, Ivan Holovach, Oleg Adamchuk, Adolfs Rucins, Aivars Aboltins</b> RESEARCH IN MINERAL FERTILISER PARTICLE THROWING DISTANCE FROM NEW CENTRIFUGAL FERTILIZER SPREADER WORKING TOOL.....	517
<b>Volodymyr Bulgakov, Semjons Ivanovs, Valerii Adamchuk, Volodymyr Nadykto, Anatolii Zaryshnyak, Vadym Yaremenko, Liudmyla Krasiuk</b> INFLUENCE OF TRACTOR HITCH LINKAGE SYSTEM ON PLOWING UNIT PERFORMANCE.....	523
<b>Firat Arslan, Sinan Kartal</b> WATER MANAGEMENT EFFECT ON TROPICAL FRUITS: CASE STUDY OF ALANYA, TURKEY .....	533
<b>Sai-Pavan Kanukuntla, Jaymin-Vrajlal Sanchaniya, Vitalijs Beresnevics</b> COMPARATIVE DSC ANALYSIS OF VIRGIN AND NANOFIBER MATS OF PA6.....	539
<b>Ivan Openko, Ruslan Tykhenko, Oleg Tsyvakh, Oleksandr Shevchenko, Yanina Stepchuk, Anatolii Rokochinskiy, Pavlo Volk, Ivan Zhyla, Oleksandr Chumachenko, Yevheniia Kryvoviaz, Anastasiia Horodnycha</b> IMPROVEMENT OF ECONOMIC MECHANISM OF RATIONAL USE OF FOREST RESOURCES USING DISCRETE MATHEMATICS METHOD.....	544
<b>Volodymyr Bulgakov, Myroslav Budzanivskyi, Martin Zach, Maros Korenko, Ivan Beloev, Dana Orszaghova, Petr Dostal, Semjons Ivanovs</b> EXPERIMENTAL RESEARCH ON QUALITY FUNCTIONING OF HAULM RESIDUE REMOVER FROM SUGAR BEET EPICOTYL.....	553
<b>Volodymyr Bulgakov, Semjons Ivanovs, Volodymyr Nadykto, Gennadii Petrov</b> INVESTIGATION OF FRONT PLOUGH FUNCTIONING STABILITY CONDITIONS WITHOUT SUPPORT WHEEL .....	562
<b>Volodymyr Bulgakov, Semjons Ivanovs, Ivan Beloev, Oleksandra Trokhaniak, Aivars Aboltins, Mykola Tkachenko, Adolfs Rucins, Yevhen Ihnatiev</b> EXPERIMENTAL RESEARCH ON PERFORMANCE OF FLEXIBLE SCREW CONVEYOR WHEN TRANSPORTING AGRICULTURAL MATERIALS .....	571
<b>Volodymyr Bulgakov, Semjons Ivanovs, Ivan Beloev, Oleksandra Trokhaniak, Aivars Aboltins, Hryhorij Kaletnik, Zinoviy Ruzhlyo</b> STUDY ON POWER PARAMETERS OF MOVING GRAIN MATERIALS WITH PNEUMATIC SCREW CONVEYOR.....	576
<b>Viktor Trokhaniak, Semjons Ivanovs, Yuri Nasieka, Oleh Chernysh, Aivars Aboltins, Yevhen Ihnatiev, Oleksandr Synyavskiy</b> USAGE OF CFD FOR RESEARCH ON LATERAL VENTILATION SYSTEM IN POULTRY HOUSE .....	582
<b>Valerii Adamchuk, Volodymyr Bulgakov, Semjons Ivanovs, Adolfs Rucins, Ivan Beloev, Volodymyr Kuvachov, Viktor Kaminskii, Oleh Chernysh</b> STUDY OF PASSIVE STEERING OF WIDE SPAN VEHICLES WITH POWER-DRIVEN STEERING METHOD.....	588
<b>Volodymyr Kuzmenko, Viacheslav Bratishko, Sergiy Subota, Oleksandr Kholodiuk</b> INFLUENCE OF MOISTURE ON PARTICLE SIZE OF PLANT RAW MATERIALS AFTER GRINDING.....	596

<b>Vilis Dubrovskis, Dagnis Dubrovskis</b> BIOGAS PRODUCTION FROM FRESH AND OLD SAWDUST LITTER WITH CHICKEN MANURE.....	602
<b>Vilis Dubrovskis, Dagnis Dubrovskis</b> METHANE PRODUCTION FROM BRIQUETTES OF BIRCH SAWDUST .....	608
<b>Izabela Adamickova, Marcela Hallova, Peter Bielik, Natalia Turcekova</b> BUSINESS DIGITIZATION IN SLOVAKIA AND ITS IMPACT ON RURAL DEVELOPMENT .....	614
<b>Pavels Tihomirovs, Aleksandrs Korjakins</b> PORE-FORMING ADDITIVES IN GLASS-CLAY COMPOSITION .....	620
<b>Maris Mangalis, Juris Priekulis, Mara Mangale</b> STUDIES OF PERFORMANCE PARAMETERS IN MILKING ROBOTS AFTER SOFTWARE IMPROVEMENT .....	624
<b>Adolfs Rucins, Dainis Viesturs, Maris Narvils, Semjons Ivanovs, Agris Auce</b> USE OF ACCUMULATED SOLAR THERMAL ENERGY IN GREENHOUSE FOR EXTENDING VEGETATION PERIOD OF CROP PLANTS .....	628
<b>Agris Auce, Indulis Arnis Horns, Semjons Ivanovs, Aivars Jermuss, Ugis Grinbergs, Adolfs Rucins</b> DEVELOPMENT OF TECHNOLOGICAL PROCESS SOLUTIONS IN MODULAR SYSTEM OF SOLAR ELECTRICITY AND HEAT SUPPLY FOR GREENHOUSES.....	636
<b>Dainis Berjoza, Inara Jurgena, Janis Laceklis-Bertmanis</b> ENERGY BALANCE ANALYSIS OF SOLAR-POWERED CATAMARAN.....	644
<b>Stanislav Nikolaenko, Oksana Bulgakova, Lesya Zbaravska, Adolfs Rucins, Ilmars Dukulis</b> RESEARCH ON INTER-DISCIPLINARY LINKS TRAINING ENGINEERS-DESIGNERS FOR AGRICULTURAL MACHINERY AT AGRICULTURAL UNIVERSITIES .....	651
<b>Oksana Bulgakova, Lesya Zbaravska, Ilmars Dukulis, Adolfs Rucins</b> CONTENT OF PROFESSIONALLY ORIENTED TRAINING IN COURSE OF PHYSICS FOR STUDENTS OF AGRICULTURAL ENGINEERING SPECIALTIES .....	661
<b>Stanislav Nikolaenko, Oksana Bulgakova, Iryna Yasinetska, Lesya Zbaravska, Ilmars Dukulis, Nataliia Shynkaruk, Adolfs Rucins</b> PROGRAMMING OF PEDAGOGICAL TECHNOLOGY FOR FORMATION OF PROFESSIONAL COMPETENCE STUDYING SPECIAL DISCIPLINES IN AGRICULTURAL ENGINEERING SCIENCES .....	667
<b>Oksana Bulgakova, Lesya Zbaravska, Sergii Hrushetskyi, Ilmars Dukulis</b> FORMATION OF INFORMATION-COMMUNICATION COMPETENCE OF FUTURE AGRICULTURAL ENGINEERING SPECIALISTS AT AGRICULTURAL INSTITUTIONS OF HIGHER EDUCATION .....	674
<b>Stanislav Nikolaenko, Oksana Bulgakova, Iryna Yasinetska, Lesya Zbaravska, Ilmars Dukulis</b> DEVELOPMENT OF INTEGRATIVE-TRANSPARENT EDUCATIONAL ENVIRONMENT TRAINING ENGINEERS OF AGRICULTURAL PRODUCTION .....	683
<b>Oksana Bulgakova, Lesya Zbaravska, Sergii Slobodian, Nataliia Shynkaruk, Ilmars Dukulis</b> MODERNIZATION OF CONTENT OF LECTURE COURSE IN PHYSICS TO TRAIN FUTURE AGRICULTURAL ENGINEERS .....	691
<b>Sergejs Kodors, Imants Zarembo, Ginta Majore, Edgars Rubauskis, Lienite Litavniece</b> DIGITAL TWIN MODELLING FOR SMART FRUIT-GROWING: ECO-CYBER- PHYSICAL SYSTEM 4+1 ARCHITECTURE.....	700
<b>Zlatin Georgiev</b> STUDY OF VIBRATIONAL BEHAVIOUR OF SHOCK ABSORBER IN HARSHNESS FREQUENCY RANGE 20-100 HZ .....	707
<b>Ivan Revenko, Vasyl Khmelovskyi, Yulii Revenko, Victor Rebenko, Svitlana Potapova</b> JUSTIFICATION OF PARAMETERS AFFECTING INCREASE OF HAMMER CRUSHER PRODUCTIVITY .....	714
<b>Volodymyr Bulgakov, Oleksii Kutsenko, Anastasiya Kutsenko, Aivars Aboltins, Semjons Ivanovs</b> REINFORCEMENT IMPACT ON STATE OF CRACKS IN CONCRETE SLABS .....	721

<b>Ilgar Jafarli, Umesh-Haribhai Vavaliya</b> MECHANICAL BEHAVIOR OF I-BEAMS REINFORCED BY UNIDIRECTIONAL CARBON FIBRE, UNIDIRECTIONAL GLASS FIBER AND CARBON FIBRE LAMINATES .....	729
<b>Oksana Pavlenko, Andrejs Matvejevs</b> COMPARISON OF LINEAR AND NONLINEAR MODELS FOR FORECASTING OF FOOD COMMODITY PRICES IN LATVIA .....	735
<b>Manfred Sneps-Sneppe</b> USE OF CRITERIA NPV AND IRR FOR CHOOSING AMONG INVESTMENT PROJECTS .....	745
<b>Sintija Ozolina</b> APPLICATION OF FURCELLARIA LUMBRICALIS IN DEVELOPMENT OF BIODEGRADABLE SEEDLING POTS .....	751
<b>Alina Girbaci, Cristian Girbaci, Camelia Stefanescu, Adia Grozav</b> SOLUTIONS AND CHALLENGES FOR SUSTAINABLE INTEGRATED MANAGEMENT OF STORMWATER IN URBANIZED AREAS OF ROMANIA.....	757
<b>Lauris Plume, Imants Plume</b> ANALYSIS OF FACTORS INFLUENCING ENERGY EFFICIENCY OF BIOGAS PLANTS .....	764
<b>Radovan Madlenak, Lucia Madlenakova, Peter Szatmari, Gyoergy Ivan Neszmelyi</b> DISTRIBUTION NETWORKS IN NATIONAL AND CROSSBORDER E-COMMERCE .....	770
<b>Radovan Madlenak, Lucia Madlenakova, Tamas Toth, Gyoergy Ivan Neszmelyi</b> GLOBAL POSTAL E-COMMERCE DELIVERY NETWORK - TRADE SOLUTION FOR SMALL AND MEDIUM ENTERPRISES TO ENTER GLOBAL MARKET .....	777
<b>Armands Veveris</b> CHANGES IN USE OF PASSENGER RAILWAY TRANSPORT DUE TO COVID-19 PANDEMIC AND EXPECTED PROSPECTS IN LATVIA .....	784
<b>Sai-Pavan Kanukuntla, Jaymin-Vrajlal Sanchaniya, Uchit Kardani, Vitalijs Beresnevs</b> NUMERICAL SIMULATION OF POLYMERIC COMPOSITE NANOFIBER MAT .....	790
<b>Harijs Kalis, Ilmars Kangro, Aivars Aboltins</b> NUMERICAL ANALYSIS FOR SYSTEM OF PARABOLIC EQUATIONS WITH PERIODIC FUNCTIONS .....	796
<b>Tatjana Sinkus, Inese Ozola</b> INTEGRATING INTERCULTURAL DIMENSION IN ESP COURSE FOR UNDERGRADUATE IT STUDENTS .....	810
<b>Janis Kramens, Edgars Vigants, Sai-Pavan Kanukuntla, Dmitri Goljandin</b> EFFICIENT ENERGY RECOVERY FROM TEXTILE WASTE AND BIOMASS MIXTURE.....	817
<b>Volodymyr Bulgakov, Semjons Ivanovs, Hristo Beloev, Oleksandra Trokhaniak, Mykola Klendii, Anatoliy Bondarchuk, Adolfs Rucins</b> SYNTHESIS OF TILLAGE MACHINES AND EXPERIMENTAL RESEARCH ON AGRO TECHNOLOGICAL INDICATORS FOR TILLAGE QUALITY .....	826
<b>Volodymyr Bulgakov, Semjons Ivanovs, Valerii Adamchuk, Volodymyr Nadykto, Volodymyr Kyurchev, Vadym Yaremenko, Liudmyla Krasiuk</b> TREATMENT QUALITY ASSESSMENT OF SUNFLOWER INTER-ROW WIDTHS WITH ASYMMETRIC JOINING OF CULTIVATOR TO TRACTOR.....	834
<b>Volodymyr Bulgakov, Aivars Aboltins, Viktor Trokhaniak, Hristo Beloev, Oleksandra Trokhaniak, Ivan Holovach, Oleksandr Synyavskiy</b> RESEARCH ON GAS DYNAMIC FLOWS IN POULTRY HOUSE LATERAL VENTILATION SYSTEM USING CFD MODELLING .....	842
<b>Viktorija Vendina, Austra Zusevica, Dagnija Lazdina</b> REVIEW OF DIFFERENT TYPES OF FERTILIZERS FOR WILLOW PLANTATIONS .....	849

<b>Sebastian Solcansky, Juraj Gerlici, Vadym Ishchuk, Denis Molnar</b> SIMULATION OF FREIGHT WAGON RUNNING ON TEST TRACK AT DIFFERENT SPEEDS AND LOAD DISTRIBUTION FROM POINT OF VIEW OF DERAILMENT SAFETY AND LATERAL FORCES .....	857
<b>Alberts Auzins, Ieva Leimane, Silvija Dreijere</b> MODELLING OF FARM-GATE NITROGEN BALANCE IN DAIRY FARMING - CASE STUDY OF LATVIA .....	864
<b>Gabriel Gheorghe, Daniel Lates, Claudiu Oprea, Carmen Baltatu</b> STRUCTURAL AND MODAL ANALYSIS IN SOLIDWORKS OF AGRICULTURAL PLOW TO CHOOSE VIBRATION SYSTEM AT MOLDBOARD.....	872
<b>Evgeni Sokolov, Evgeni Dimitrov, Lilo Kunchev</b> EXPERIMENTAL STUDY ON TRANSPORT MODES OF HEAVY TRUCKS .....	879
<b>Vladislav Zavadskiy, Gita Revalde</b> CLEAN ENERGY AND HYDROGEN PERSPECTIVES IN RURAL REGIONS OF KAZAKHSTAN .....	888
<b>Tetiana Tkachenko, Viktor Mileikovskiy, Ihor Satin, Adam Ujma</b> AGROCENOSSES AIR IMPROVEMENT FOR LONGER AND HEALTHIER PEOPLE LIFE.....	895
<b>Daria Vakulenko, Viktor Mileikovskiy, Tetiana Tkachenko, Adam Ujma, Viktoriia Konovaliuk</b> ANALYSIS OF CRITICAL RADIUS OF INSULATION FOR HORIZONTAL PIPES.....	902
<b>Dace Brizga, Olga Miežite, Vija Ozolina, Linards Sisenis</b> IMPROVEMENT OF LABOUR PROTECTION SPECIALISTS COMPETENCE ASSESSMENT OF COGNITIVE ERGONOMIC ASPECTS IN JSC LATVIAN STATE FORESTS (LVM) NURSERIES .....	908
<b>Ana Zaica, Radu Ciuperca, Alexandru Zaica</b> RESEARCH ON PROCESS OF CUTTING SUPERFICIAL ROOTS IN TREES.....	915
<b>Istvan Grajczar, Krisztina Schottner, Janos Harskuti</b> WELLBEING ELEMENTS IN COMPANIES LOCATED IN DIFFERENT SETTLEMENT TYPES IN HUNGARY .....	925
<b>Timur Valiev, Viktor Polishchuk</b> RESEARCH ON YIELD OF BIOGAS DURING METHANE FERMENTATION OF COW MANURE WITH ADDITION OF GRANULATED STRAW WITH SLAKED LIME .....	931
<b>Santa Bormane, Biruta Sloka, Daina Skiltere</b> SUSTAINABLE CONSUMPTION AND WASTE MANAGEMENT.....	937
<b>Svetla Stoilova</b> MULTI-CRITERIA APPROACHES FOR CHOOSING INTERMODAL TECHNOLOGY FOR CONTAINER TRANSPORTATION .....	943
<b>Malgorzata Ulewicz, Wieslaw Liszewski</b> PROBLEM OF UTILIZATION OF ASBESTOS-CEMENT SHEETS IN POLAND.....	951
<b>Yaroslav Blikharskyy, Jacek Selejdak, Roman Khmil, Zinoviy Blikharskyy</b> RESEARCH ON CONCRETE PROPERTIES BY DIC METHOD .....	958
<b>Ilze Janpavle, Una Ile</b> ACCESSIBILITY OF ACTIVE LEISURE AREAS AND SOCIAL INCLUSION IN CONTEXT OF URBAN PLANNING.....	964
<b>Zheng Bin Pan, Yun Xiang Lu, Xue Rui Yang</b> RESEARCH ON APPLICATION OF VISCOUS DAMPING TECHNOLOGY IN REINFORCEMENT AND RECONSTRUCTION OF EXISTING BUILDINGS.....	974
<b>Ming Wang, Yonghao Zeng, Ying Chen, Shiyi Zhang</b> CRYSTAL STRUCTURE EFFECT ON METALLIC MECHANICAL PROPERTIES OF UNDER TENSION STRESS: MOLECULAR DYNAMICS STUDY .....	980
<b>Chaocheng Yu, Zhiguang Zhao, Xiaoling Qu, Sanyin Zhao</b> INFLUENCE OF POLYMER ON MECHANICAL STRENGTH AND STRUCTURE OF MORTAR.....	985

<b>Andrzej Zyromski, Marcin Wdowikowski, Bartosz Kazmierczak</b> ESTIMATION OF EVAPOTRANSPIRATION EMPIRICAL COEFFICIENTS OF SCOTS PINE ( <i>PINUS SYLVESTRIS</i> ) UNDER CLIMATE CHANGE CONDITIONS.....	991
<b>Xiaoling Qu, Zhiguang Zhao, Chaocheng Yu, Sanyin Zhao</b> PREPARATION OF HIGH-EFFICIENCY FOAMING AGENT AND ITS APPLICATION IN FOAMED CONCRETE.....	998

**Abstract.** The article presents the design of a pneumatic screw conveyor used to move (transport) grain materials. On the basis of this design, an experimental setup was created, enabling the performance of the new conveyor belt to be investigated in the laboratory, including the power parameters. The Altivar-71 frequency converter was used in experimental studies to determine the power parameters of the pneumatic screw conveyor for the transport of grain materials. Based on the results of the experimental studies, graphs of the power characteristics of the pneumatic screw conveyor drive over the time of the transport of grain materials were obtained. By analysing the graphs obtained, it is established that the smooth operation of the conveyor belt depends on the properties of the transported material. In particular, it affects the switching frequency of the pneumatic drive, which prevents it from overloading and, therefore, premature breakdown. In addition, activation of the pneumatic actuator destroys the resulting thickening of the transport granular material. Experimental studies have also been conducted on changes in performance  $Q$  of the pneumatic screw conveyor depending on the initial values of the high-pressure air supply  $P$ .

**Key words:** transport, grain material, pneumatic screw conveyor, power characteristics.

### Introduction

One of the most important causes of poor quality grain material is damage during handling operations. High-pressure blower-type pneumatic conveying equipment is used to transport grain, with a capacity of  $5...30 \text{ t}\cdot\text{h}^{-1}$ , feed length up to 100 m, air velocity  $15...40 \text{ m}\cdot\text{s}^{-1}$  with overpressure up to  $(0.6...0.8)\cdot 10^6 \text{ Pa}$ . However, in a number of cases it has proven to be inefficient, as it is expensive to maintain, structurally complex, and requires the use of cyclones to capture material particles from the dust cloud flow.

Auger screw conveyors as a separate technical element of transport mechanisms have found widespread use in the layout of machines for handling or movement of bulk materials due to their simple construction, maintenance and the ability to load and unload material at any point in the process line [1-4].

A common disadvantage of screw mechanisms is that the helical coils do not only provide translational axial movement of the material, but also rotational movement, resulting in damage to the material and reduced performance of such mechanisms. For transporting agricultural bulk solids and grain materials with minimal damage, combinations of mechanical feeding by a screw feeder with compressed air feeding are also used [5-7]. The (Buteler M. et.al., 2020) study presents the design and the evaluation of a laboratory device, which combines mechanical motion of wheat grain and turbulent air streaming inside a positive pneumatic conveyor system [8]. The experimental results, which were conducted under laboratory conditions, show that the recovery efficiency of the prototype was equal to 98.0% ( $\pm 1.4$ ) on average. The work [9] presents the experimental characterization of the industrial bulk solid feeder, named Batchpump, and validates the performance in terms of transport capacity and compressed gas consumption of an unconventional compact pressure vessel, used as a feeding device for dense phase pneumatic conveying. The developed device was shown to have similar performance parameters (transport rate and gas consumption) when compared to conventional versions of blow tanks operating at 4 bar pressure and conveying powder material at about  $9 \text{ t}\cdot\text{h}^{-1}$  rate, albeit the smaller dimensions and simplification in operation, resulting in significant advantages in retrofits and in the implementation of a new conveyor line. The paper [10] covers critical speed of pneumatic transport for conveying materials and measuring the angle of friction and the coefficient of restitution of materials on a variety of material surfaces. With the help of a machine verification test it was proved that the

optimal parameters for pneumatic transportation of Baisha peanut pods with a moisture content of 7.24% was a fan speed of  $2700 \text{ r}\cdot\text{min}^{-1}$  and a cushioning/anti-obstruction layer thickness of 6 mm.

Thus, among the current challenges of agricultural production, it is important to develop and justify the rational parameters of pneumatic auger conveyors that ensure efficient movement of grain materials.

The aim of the work is to determine the power parameters of the pneumatic screw conveyor, which will ensure efficient movement of grain materials along the technological routes of different spatial configuration under permissible damage to the grain.

## Materials and methods

To achieve this, we have designed and manufactured a prototype of a newly designed pneumatic auger conveyor (Fig. 1). It consists of supports 1 and 2 on which the drive 3, conveyor body 4 with a hopper 5 and auger shaft 6, pneumatic system 7 and the pneumatic valve 8 are installed. The conveyor line consists of consecutively interconnected sections 9 with the length of  $l$ , each section 9 containing an elastic sleeve 10 which is secured on the right-hand side to a cylindrical connector sleeve 11 by means of a ring 12 adjustable by tightening a bolt 13.

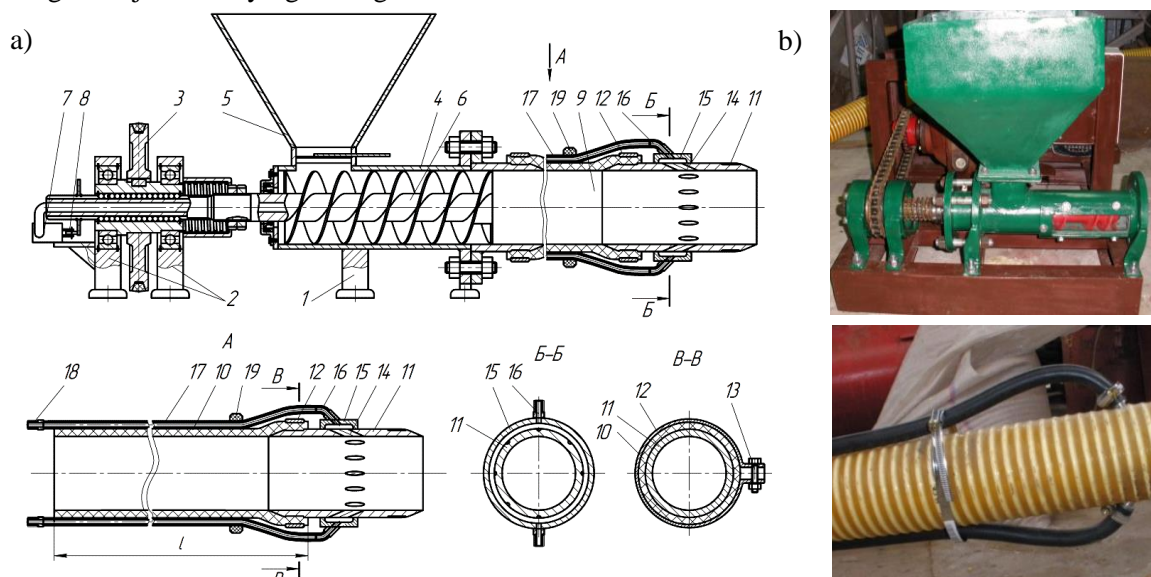

Fig. 1. Construction diagram (a) and general view (b) of the pneumatic auger conveyor with supply hoses connected to the flexible cover

In the central part of the cylindrical sleeve 11 there are holes 14 bent in the direction of bulk material transport, which are covered by U-shaped bushes 15, with sockets 16 angled in the direction of material transport on the outer diameters, to which the compressed air hoses 17 are connected. On the left side of the elastic casing, air hoses 17 are fitted with inlet nozzles 18, which are connected to the conveyor's common pneumatic system, whereby the length of the air hoses 17 in each subsequent section is twice as long as in the preceding one. The hoses 17 of each section 9 are offset in relation to each other by  $90^\circ$  on the forming cylindrical surface of section 9. Along the length of each section 9, pneumatic hoses 17 are attached to them with clamps 19.

During operation the loose material enters the conveyor housing 4 through the hopper 5 into the screw feeder 6. If overloading occurs due to a build-up of a certain amount of bulk material in the working chamber of the conveyor housing 4, the screw feeder 6 shifts axially in the opposite direction to the direction of transport of the material. Hoses 17 feed air into each section 9 through openings 14 and liquefy the bulk material which has accumulated in them.

The Altivar-71 frequency converter with Power Suite v.2.5.0 software was used to determine the power parameters of the bulk material handling process during the experimental studies. The Altivar-71 frequency converter is connected to the mains and a computer and allows soft-starting and frequency control of the air screw conveyor motor.

The bulk materials used in the experiments were wheat, bran and sawdust.

The motor voltage was 380 V; the current frequency varied from 0 to 40 Hz, corresponding to 0...450 rpm of the conveyor screw.

## Results and discussion

Based on the results of the experimental studies, graphical dependencies of the energy-power characteristics of the pneumatic screw conveyor drive in time during transportation of the specified agricultural materials are plotted.

Fig. 2 shows plots of the power consumption of the conveyor drive over time for the transport of 2.5 mm wheat.

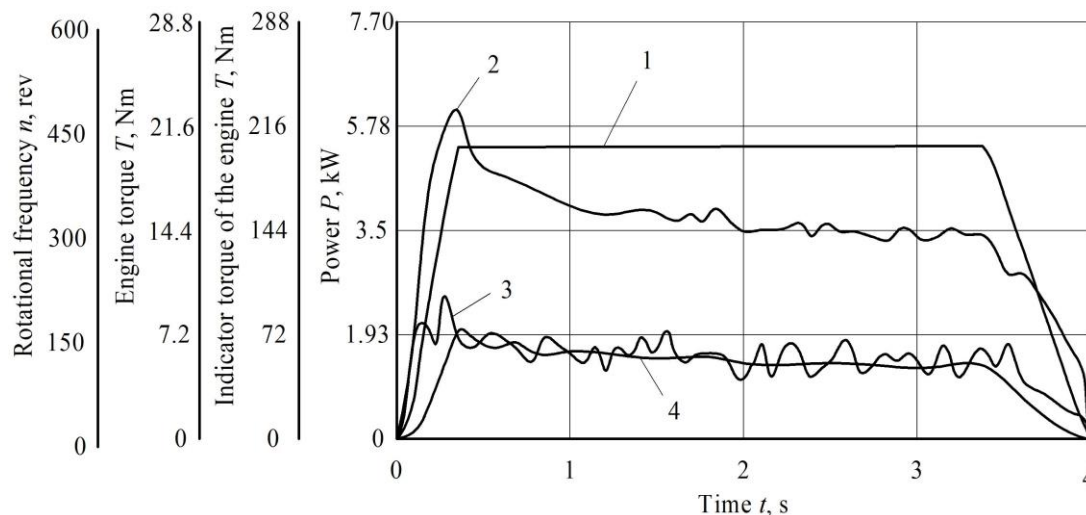

Fig. 2. Diagrams of changes in energy-power characteristics of the pneumatic screw conveyor drive in time when conveying wheat of 2.5 mm fraction: 1 – current output frequency; 2 – motor torque; 3 – motor indication torque; 4 – motor power

By analysing the resulting graphs (Fig. 2) three stages can be identified for the pneumatic auger conveyor. The first stage is characterised by an increase in load on the drive, which is explained by its acceleration from 0 to 450 rpm.

The second stage of the conveyor is characterised by an even operating mode. Cyclic growth of the torque on the drive and its subsequent decrease is explained by accumulation of the bulk material in the feeder housing, which leads to an increase in load on the drive and release of air flow from the air distributor, which leads to a decrease in load on the drive.

The third stage of the conveyor belt operation is the shutdown, which is characterised by a decrease in all of the drive energy-power characteristics from the set value to 0.

Fig. 3 shows graphs of the energy and power performance of the conveyor drive over time when conveying sawdust with a fraction of 1.5 mm.

Analyzing the graph (Fig. 3) of the change of power characteristics of the conveyor drive during the time at transportation of sawdust with fraction 1.5 mm, we see that the first stage of the conveyor drive operation is characterized by growth of all power parameters, that is a consequence of the growth of the drive frequency.

The second stage of the drive is characterised by a more intensive engagement of the reflected pneumatic spreader than for wheat transport in Fig. 3 (curve 3).

The third stage of the conveyor belt operation is the shutdown, which is characterised by a reduction in all of the drive energy-power characteristics from the set value to 0. However, the reduction in the torque on the drive is gradual.

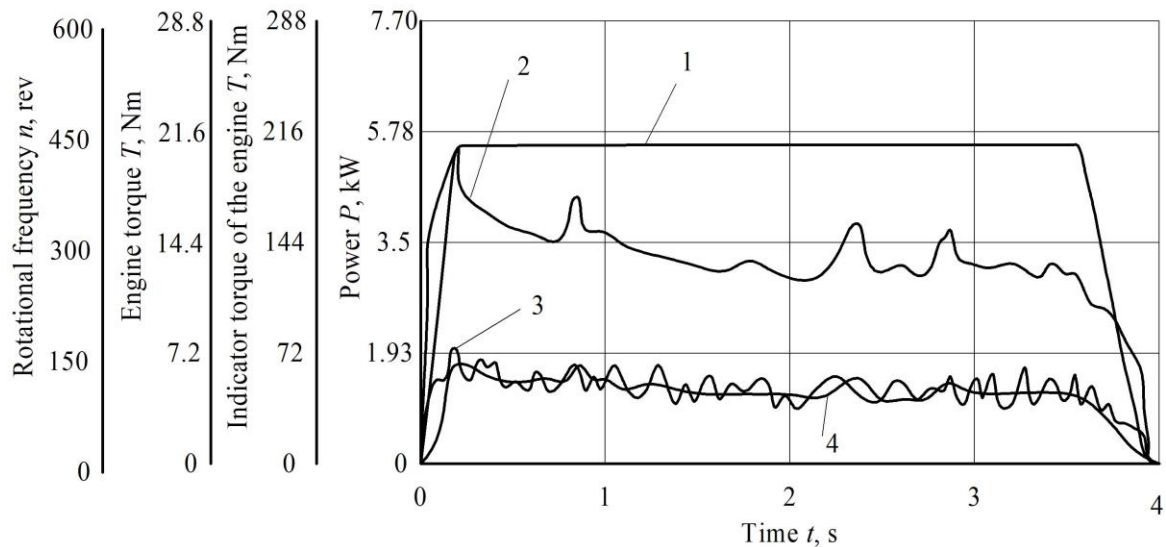

Fig. 3. Diagrams of changing energy and force characteristics of the pneumatic screw conveyor drive in time when conveying sawdust with 1.5 mm fraction: 1 – current output frequency; 2 – motor torque; 3 – motor indication torque; 4 – motor power

Fig. 4. shows graphs of the energy and power performance of the conveyor drive over time when transporting bran with 1 mm fraction.

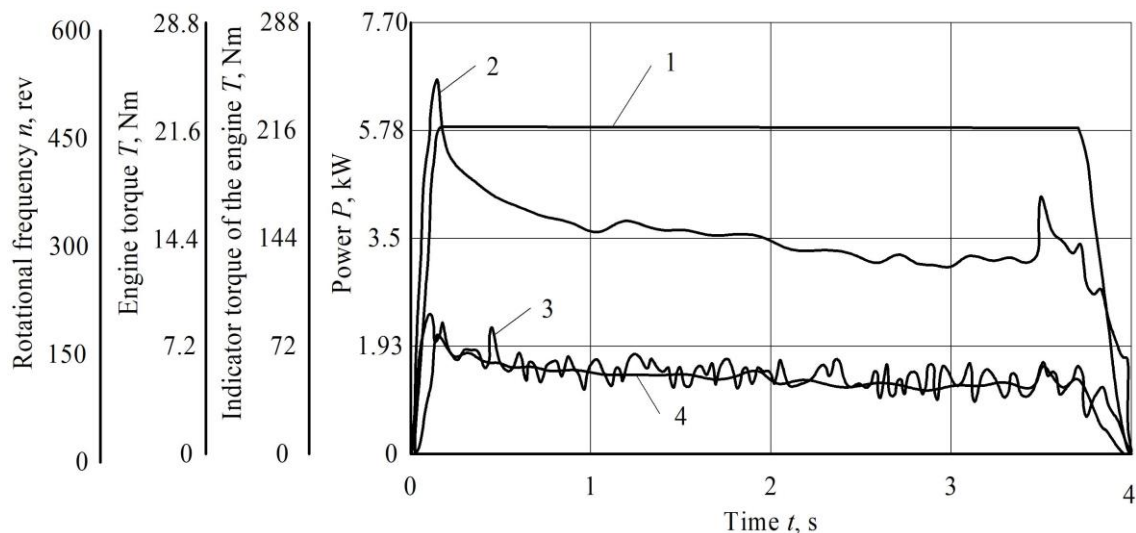

Fig. 4. Diagrams of energy and power performance of the pneumatic screw conveyor drive in time when conveying bran with a fraction of 1 mm: 1 – current output frequency; 2 – motor torque; 3 – motor indication torque; 4 – motor power

Analyzing the graphs (Fig. 4) of power characteristics of the conveyor drive during transportation of bran with a fraction of 1 mm, we see that the first stage of the conveyor drive is characterized by growth of all power parameters, which is the consequence of growth of the drive frequency.

The second stage is characterised by a uniform operating mode. However, the torque cycling is much higher due to the more frequent accumulation of bulk material in the feeder housing.

The third stage of the conveyor belt operation is the shutdown, which is characterised by a decrease in all power characteristics of the drive from the set value to 0. However, the decrease in the power characteristics, in particular the torque on the drive, did not occur smoothly.

When analysing all three graphs, we can note that the smoothness of the conveyor belt depends on the properties of the material to be conveyed, in particular the frequency with which the pneumatic drive is activated to prevent it from overloading and consequently breaking down. In addition, the activation of the pneumatic drive breaks up the resulting compaction of the bulk agricultural material, allowing the

efficient movement of grain materials along process routes of different spatial configurations while permitting damage to the grain.

The maximum transportation distance of loose material using one section is: wheat – 1.6 m, bran – 2.5 m, sawdust – 3 m. To determine the maximum range of various loose agricultural materials (wheat, sawdust, bran) the methodology and its implementation method based on the pneumatic screw conveyor (Fig. 1) is shown in Fig. 5. At constant feeder speeds of  $n = 450$  rpm and feed within  $0.002$  to  $0.003 \text{ m}^3 \cdot \text{s}^{-1}$  at pressure values  $P$ , of the range of  $0.2 \cdot 10^6 \leq P \leq 0.3 \cdot 10^6 \text{ Pa}$  determined the range of the material.

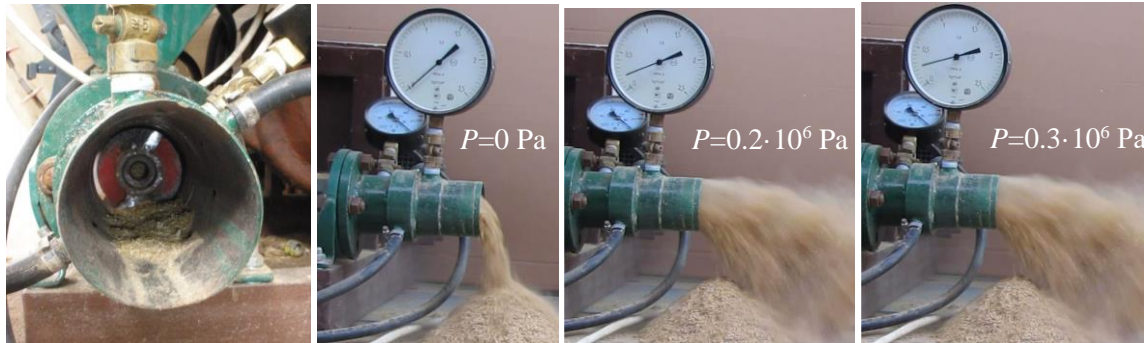

Fig. 5. General view of bran exit from the nozzle at different values of the air pressure  $P$

Experimental studies have also been conducted on changes in performance  $Q$  of the pneumatic auger conveyor as a function of the initial values of the high-pressure air supply  $P$ , the results of which are shown in the graphical diagram (Fig. 6).

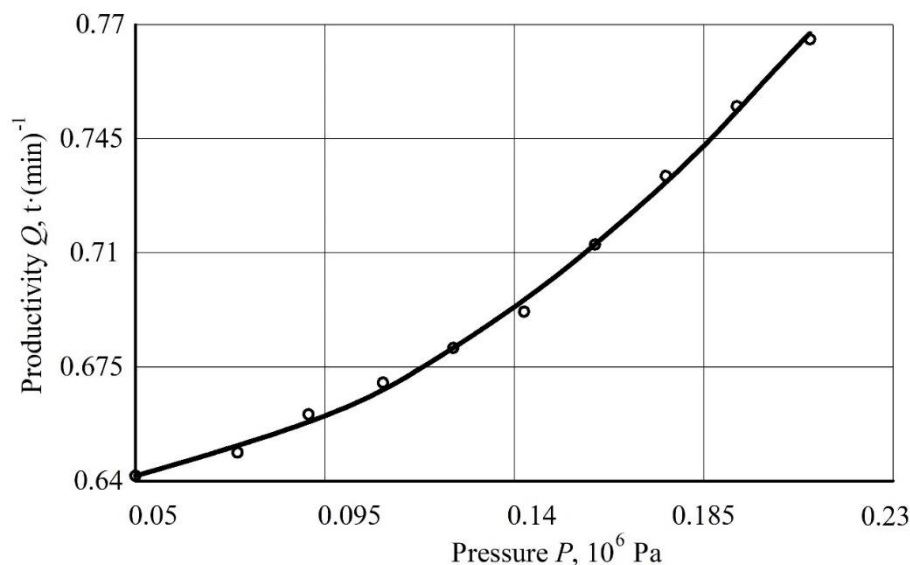

Fig. 6. Dependence of performance variation as a function of air pressure  $P = (0.5 \dots 0.21) \cdot 10^6 \text{ Pa}$

An analysis of these graphs shows that the change in the operating pressure  $P$  in the range of  $(0.05 \dots 0.2) \cdot 10^6 \text{ Pa}$  has practically no effect on the performance of the pneumatic auger conveyor, and acceleration of material movement is observed at  $P_{\min} \approx 0.2 \cdot 10^6 \text{ Pa}$ .

The results of the experimental studies can be used to develop industrial designs for pneumatic screw conveyors.

## Conclusions

1. Based on the literature analysis and patent search, a pneumatic screw conveyor is designed and manufactured for experimental research. The Altivar-71 frequency converter was used in the experimental studies to determine the energy-power parameters of the conveyor when moving bulk materials. Based on the results of the experimental studies, graphs of the energy-power

- characteristics of the pneumatic screw conveyor drive over time during the transport of grain materials were obtained.
2. By analysing these graphs, we have found that the smoothness of the conveyor belt depends on the properties of the material to be conveyed, in particular the frequency with which the pneumatic drive is activated, which prevents overloading and therefore premature breakdowns. In addition, the activation of the pneumatic drive breaks up the resulting compaction of the bulk agricultural material, allowing the efficient movement of grain materials along process routes of different spatial configurations while permitting damage to the grain.
  3. Experimental studies have also been conducted on changes in the performance  $Q$  of the pneumatic auger conveyor depending on the initial values of the high-pressure air supply  $P$ , according to which it was found that the change in the operating pressure  $P$  in the range of  $(0.05 \dots 0.2) \cdot 10^6$  Pa has practically no effect on the performance of the pneumatic auger conveyor, and acceleration of material movement is observed at  $P_{\min} \approx 0.2 \cdot 10^6$  Pa.
